

## TO WHO IT MAY CONCERN

Fracarro was founded in 1933 and is now the market leader in the SMATV European market .We are specialised in designing and manufacturing devices for centralised reception, processing and distribution of TV signals. Our expertise in research and development has made us the preferred partners of many TV operators worldwide.

When Fracarro took over the Philips SMATV product line in 2002, our brand transfer policy has been to not change any technical specification of the existing Philips products but just to change the brand on the product.

All the aerials and head-end systems of the Fracarro range are manufactured in our European community factories.

We wish to also confirm that Satcomnet Systems distributes and commissions SMATV and CATV products for several years and has been trained and certified by our very own technical team for the last 9 years.

Thanks to their very good technical and commercial knowledge of our products, Satcomnet Systems is our only authorized distributor for Malaysia/Singapore/Brunei.

Yours Sincerely

Rudy Tricoire  
Regional Manager Asia-Pacific & Middle-East  
Fracarro
