

HEADLINE

FRACARRO

FRACARRO'S PROFESSIONAL SOLUTION FOR EVERY HEADEND APPLICATION

- COFDM modulators
- PAL modulators
- DVB-S, DVB-S2, DVB-T receivers
- IP encoders
- Fibre optic
- Controller host
- Subracks
- Accessories

Headline is the new professional range for television signal distribution in:

- >> Large residential dwellings >> Hospitality
- >> Holiday villages >> Prestigious installations (airports, embassies, agencies, etc.)

>> KEY POINTS

- Professional installations >> 19" rack mounting
- Flexibility >> Easy integration of different modules
- System reliability >> Modules powered by their own power supply unit
- Constant operation of the installation >> Hot insertion
- Remote control >> Controller host unit to get access to the headend via PC, Ethernet or GSM
- Compact size >> Maximises the number of modules contained in one 19" rack

A complete range of products to receive and distribute television signals in large networks. Advanced technology makes the Headline range powerful and highly innovative.

HIGHLY PROFESSIONAL

The new modular Headline range has been designed for installation in a 19" rack cabinet. High performances are required on each product in this range.

INNOVATIVE

Different technological solutions (analogue and digital modulators, IP encoders, fibre optic modules) make Headline highly innovative

FLEXIBLE

The Headline range is extremely flexible to install as different types of modules can be integrated easily.

VERY EFFICIENT

To guarantee the constant operation of the installation (even if a few modules are temporarily unavailable), each device is equipped with its own power supply. Therefore, no need for power supply redundancy. Moreover, the hot insertion of modules means they can be installed or replaced while the whole system continues to operate.

COMPACT SIZE

Compact devices - height 13cm (3U), width 3.5cm (7e) - allows large numbers of modules to be installed. 11 units can be fitted in one row and up to 95 modules can be fitted in a cabinet.

EASY INSTALLATION

Premounted 19" subrack to install the modules in a 19" rack cabinet with interconnection module included, enables the installer to easily fit the racks in the cabinet and to add new headline modules.

EASY MAINTENANCE WITH REMOTE CONTROL

Thanks to a controller host unit, all modules can be remotely controlled and monitored via PC, Ethernet or GSM

>>SIG7120 (code 283950)

Modulator TS → COFDM

The SIG7120 modulates to DVB-T standard (using COFDM modulation) a signal received from the transport stream on the back panel. It is mainly used with signals coming from the digital receiver SIG7100. Up to 3 modulators can be used with one receiver and are connected through the back panel.

On the front panel there are F connectors for mixing in signals and COFDM. LCN embedded and MPEG4 compliant.

TECHNICAL DATA

Item		
SIG7120		
Transport Stream input	Connector	48 poles on the back-panel
	Type	Parallel
	Maximum bitrate	100Mbit/s
	Output connector	F female
	Output frequency	108-862MHz
	Frequency step	10KHz
	Maximum output level	85dB μ V
	Level adjustment	0-15dB
	Loop-through loss	< 1.5dB
	Carrier	2K, 8K
	Modulation	QPSK, 16QAM, 64QAM
	FEC	1/2, 2/3, 3/4, 5/6, 7/8
	Guard interval	1/4, 1/8, 1/16, 1/32
	Spectrum	Normal/Inverted
	MER	38dB
General features	Mains voltage	220-240V~, 50-60Hz
	Power consumption	11W
	Dimensions (rack version)	35.5 (7e) × 133.3 (3U) × 240mm
	Operating temperature	-10 to +45°C

KEY POINTS

- Modulator with TS input on the back panel
- LCN embedded
- Remote configuration and monitoring (via controller host SIG7905 and FHM software).
- F connector for mixing in signals and COFDM signals
- HD compliant
- Modular solution (up to 3 modules can share the same TS Input)
- MPEG2/MPEG4 compliant

Audio Video Modulators

>>SIG7282S

(code 283944)

>>SIG7281

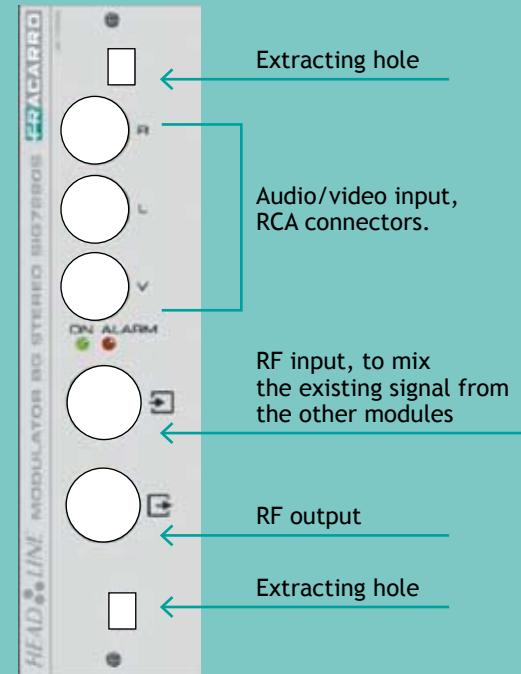

(code 283933)

Audio video modulators. Double conversion, double saw filter and tracking filter built in. One module covers the whole 47-862MHz band, very high C/N ratio to allow the distribution of more than 95channels. Available in PAL B/G mono (SIG7282), PAL B/G stereo (SIG7282S) and multistandard (SIG7281).

>>

FRONT PANEL

KEY POINTS

- Fully agile VSB modulators with double conversion, saw filter and tracking filter built in, to distribute more than 95 channels in one headend. One module covers the whole 47-862MHz band simplifying the installation and maintenance of the system
- Audio carrier level adjustment
- Very high C/N in any output setting condition (80-95dBuV)
- High output level, 95dBuV
- RCA (cinch) connectors for audio and video input/output, F connectors for RF input/output
- Modulators are available in PAL B/G mono, PAL B/G stereo and multistandard
- Cable and accessories included in the packaging
- Remote configuration and monitoring

Accessories included in the packaging:

- KPR41 solid bridge used to mix the signal
- CV-RCA/HQ high quality RCA cable

>>SIG7100 (code 283949)

Receiver DVB-S/S2 → TS

The SIG7100 module, using its Common Interface slot, distributes a free-to-air or encrypted digital signal from satellite in DVB-S1 or DVB-S2 standard. It enables the audio/video signal to be available in a transport stream form distributed on the back-panel. In a typical application, it can be connected to an SIG7120 module (modulator) that, using the transport stream flow, creates a COFDM multiplex. It can also be connected to an IP Encoder SIG7720 creating more IP multicast streaming.

FRONT PANEL

KEY POINTS

- CI slot available to decode the encrypted programs. Compatible with more than 150 existing CAM
- Guaranteed compatibility with future CAM's by software update
- It can generate 14 or 18V, 22KHz tone and DiSEqC 1.0, suitable to feed LNB or to control multiswitch output
- Loop-through input for the connection of several receivers on the same SAT polarity
- Programmable via FHM software
- MPEG2/MPEG4 compliant

>>SIG7404 (code 287075)

Analogue → MPEG-2 TS Encoder

The SIG7404 module encodes 4 analogue inputs.

It enables the audio/video signals to be available in the transport stream in an MPEG2 form, distributed on the ASI output.

In a typical application, it can be connected to the SIG7121 module (modulator) that, using transport stream flow, creates a COFDM multiplex. It can be also connected to an IP encoder SIG7721 creating many IP multicast streams.

It supports PAL and NTSC standards

TECHNICAL DATA

Item		
SIG7404		
Input	Video connectors	CVBS, S-Video
	Video format	PAL, NTSC
	Audio connectors	Analog balanced
Output	Type	DVB-ASI
	Max. bit rate	170Mbps
	Effective bit rate	1-15Mbps
	Connector	BNC, 75 Ohm
	ASI mode	BYTE
Coding	Video standard	MPEG-1, MPEG-2 MP@ML(4:2:0)
	Video bit rate	2.5-15Mbps
	Audio	MPEG-1 Layer I, Layer II
	Audio rate	32, 64, 128, 192, 256, 384Kbps
	Audio sampling rate	32, 44.1, 48KHz
General features	Output connector	ASI
	Standard Video	PAL, NTSC
	Video format	Full D1, Half D1, SIF, QSIF
	Mains voltage	220-240V~, 50-60Hz
	Power consumption	30W
	Dimensions	318 × 483 × 44mm
	Operating temperature	-10 to +45 °C

KEY POINTS

- Supports 4 input AV signals with coding and multiplexing
- Ideal solution for AV to COFDM conversion (with SIG7121) and AV to IP conversion (with SIG7721)
- Standard video channel MPEG-2 coding
- Bit rate 1 - 15Mbps
- Formats supported are Full D1, Half D1, SIF, QSIF
- Supports PAL and NTSC

>>SIG7121 (code 283953)

COFDM modulator with ASI input

The SIG7121 modulates to DVB-T standard (using COFDM modulation) a signal received in the ASI input. It is mainly used with signals coming from an SIG7404 analogue to ASI 4 IN converter. Additional COFDM modulator can use the same ASI input through back panel connection. LCN embedded.

TECHNICAL DATA

Item		
SIG7121		
ASI input	ASI connector	BNC, 75 Ohm
	Max. bit rate	216
Back panel TS input	Connector	48 poles on the back-panel
	Type	Parallel
	Maximum bit rate	100Mbit/s
Output signal	Output connector	F female
	Output frequency	108-862MHz
	Frequency step	10KHz
	Maximum output level	85dB μ V
	Level adjustment	0-15dB
	Loop-through loss	< 1.5dB
	Carrier	2K, 8K
	Modulation	QPSK, 16QAM, 64QAM
	FEC	1/2, 2/3, 3/4, 5/6, 7/8
	Guard interval	1/4, 1/8, 1/16, 1/32
	Spectrum	Normal/Inverted
	MER	38dB
General features	Mains voltage	220-240V-, 50-60Hz
	Power consumption	11W
	Dimensions (rack version)	35.5 (7e) x 133.3 (3U) x 240mm
	Operating temperature	-10 to +45°C

KEY POINTS

- COFDM modulator with ASI input on the front panel
- LCN embedded
- Up to 3 additional COFDM modulators (SIG7120) can share the same ASI/ TS input
- Remote configuration and monitoring (via controller host SIG7905 and FHM software)
- HD compliant
- F connector for mixing in signals and an RF output for modulated signals
- MPEG2/MPEG4 compliant

>>SIG7710
(code 283945)
IP encoders

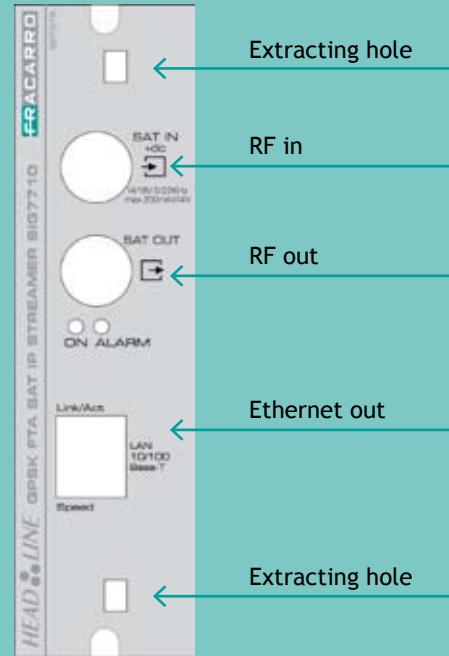

Encoders that work as a DVB-S (SIG7710) and as a DVB-T (SIG7730) to IP gateway. Satellite and Digital Terrestrial Television signals are received on the F connector input, converted to IP standard signals and streamed through RJ45 output port into LAN. SIG7720 is an encoder that works from Transport Stream (TS) to IP gateway. Input signals can be received from either an SIG7100 module (DVB-S2 to TS) or an SIG7540 module (DVB-T).

	Operating temperature		-10 to +45°C	

* Technical specifications written in light grey refer to SIG7100 and SIG7540 items

>>SIG7600 - HTX (code 270678)

HTX Optical transmitter

Optical transmitter
that converts an
RF TV-SAT frequency
band into an optical
signal.

TECHNICAL DATA

Optical wavelength	1,100-1,600nm
Optical output power	1,310mw (dBm)
Optical return loss	>55dB
RF bandwidth	47-2150MHz
Flatness TV (47-862)	±1dB
Flatness SAT (950-2150)	±2dB
Link flatness* (47-2150)	±2.5dB
RF Input level**	80-85dB μ V (opt. 85)
RF Return loss	>10dB
SNR	see table
Input impedance	75 Ohm
RF Connector	F female
Optical connector	SC/APC single mode
Operating voltage	220-240Vac, 50-60Hz
Power consumption	4W
Operating temperature	-10 to +45°C
Dimensions (rack version)	35.5 (7e) x 133.3 (3U) x 240mm
Mounting***	Rack 3u

* link made with HTX-KRX

** 42 channels, regulation EN50083-3, CTB > 60dB, CSO > 60dB

*** mandatory to use subrack code no. 283930

SIGNAL TO NOISE RATIO

KRX
Output level
per channel (dB μ V)

Dimensions (rack version)	35.5 (7e) x 133.3 (3U) x 240mm	

>>SIG7905 (code 283941)

Controller Host

Module for local and remote connectivity of the professional Headline headends via Ethernet (LAN or WAN) and GSM.

Fracarro Headend Management (FHM) software enables the headend devices' firmware to be updated remotely.

Firmware can also be upgraded (both for SIG7905 and for the other modules) by using USB memory stick.

For monitoring and remote configuration of all Headline modules.

TECHNICAL DATA

Item	SIG7905	
	Mass memory	SD slot (SD card not supplied)
	Connection to external peripheral units	RS-232 serial port
	Connection to the Ethernet network	Ethernet RJ-45
	Connection to pen drive	USB 1 (200mA), USB2 (400mA)
	Digital video input	RJ-45 10-pole connector
	Front key to change status (temporary suspension of the Controller Host - Master/Slave activities)	Key to change status
General features	Mains	220-240Vac, 50-60Hz
	Consumption	4W
	Dimensions (rack version)	35.5 (7e) x 133.3 (3U) x 240mm
	Operating temperature	-10 to +45°C
	Compliant to	EN50083-2, EN60065

>>Fracarro Headend Management (code 289888)

Programming software for Fracarro headends

This software allows full management of K Series, SAF, SIG9708CI and Headline headends. Fracarro Headend Management (FHM) enables all configuration parameters to be changed both locally and remotely by using Controller Host SIG7905.

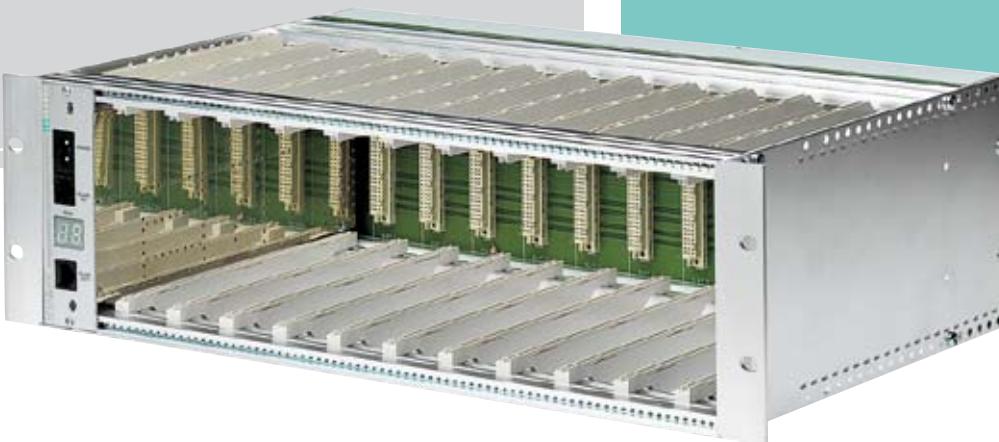

KEY POINTS

- For remote configuration and monitoring
- Using FHM with the controller host SIG7905 critical parameters of connected modules can be viewed both locally and remotely
- For user defined parameters, an upper and lower alarm limit can be set

>>SIG7901 (code 283930)

19" Sub-rack

19"sub-rack to be installed in a 19" rack cabinet. Interconnection module SIG7900 included. 11 modules can be fitted.
SIG7901 is fully mounted, with all the accessories included in the packaging.

>>

TECHNICAL DATA

DIMENSIONS SIG7901

Length 48.3cm

Height 13.3cm

Depth 28.8cm

SLOTS AVAILABLE

12 (one SIG7900 + eleven other modules)

TECHNICAL DATA FOR INTERCONNECTION MODULE SIG7900

Mains 220-240Vac, 50/60Hz, class II

Consumption 2W max. (standalone)

100W max. (with all the modules connected)

Back panel connections 220Vac, RS485, address line

Dimensions (rack version) 35.5 (7e) x 133.3 (3U) x 240mm

Operating temperature -10 to +45 °C

Compliant to EN50083-1, EN50083-2, EN60065

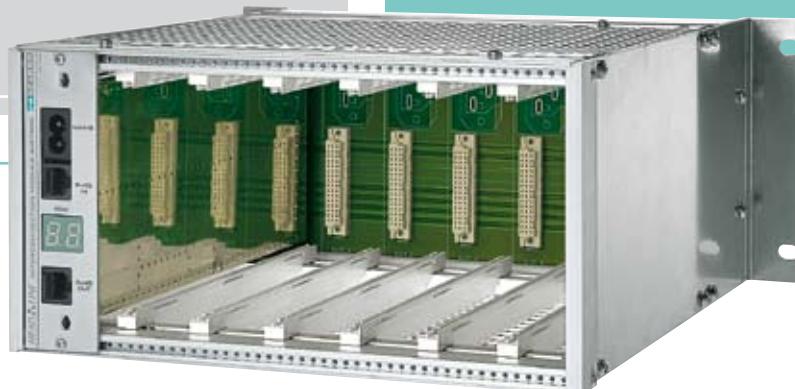

Accessories included in the packaging:

- Mains cord
- Extracting tools, to extract the module from the sub-rack
- Channel and module labels
- Interconnection module SIG7900

>>SIG7902 (code 283939)

Wall mount for 6 modules

19"sub-rack to be installed on a wall. Interconnection module SIG7900 included. 6 modules can be fitted. SIG7902 is fully mounted, with all the accessories included in the packaging.

>>

TECHNICAL DATA

DIMENSIONS SIG7902

Length 31.4cm

Height 13.3cm

Depth 29.8cm

SLOTS AVAILABLE

7 (one SIG7900 + six other modules)

TECHNICAL DATA FOR INTERCONNECTION MODULE SIG7900

Mains 220-240Vac, 50/60Hz, class II

Consumption 2W max. (standalone)

100W max. (with all the modules connected)

Back panel connections 220Vac, RS485, address line

Dimensions (rack version) 35.5 (7e) x 133.3 (3U) x 240mm

Operating temperature -10 to +45°C

Compliant to EN50083-1, EN50083-2, EN60065

Accessories included in the packaging:

- Mains cord
- Extracting tools, to extract the module from the sub-rack
- Channel and module labels
- Interconnection module SIG7900

>>Accessories

>>SIG7900 (code 283935)

Interconnection module

Interconnection module to power and address the Headline modules, installed in the SIG7901 and SIG7902 sub-rack. Allows the distribution of mains voltage to power all the modules installed in the same row.

Moreover, it distributes the data bus to address and control the modules. Available in single packaging.

TECHNICAL DATA

Mains
220-240Vac, 50/60Hz, class II

Consumption
2W max (stand alone)
100W max (with all the modules connected)

Operating temperature
-10 to +45°C

Back panel connections
220Vac, RS485, address line

Dimensions
35.5 (7e) x 133.3 (3U) x 240mm

Compliant to
EN50083-1, EN50083-2, EN60065

FRONT PANEL

Extracting hole

Mains socket

RJ45 input socket, to connect the module to the previous SIG7900 in the headend

Display to show the line number to get access to the modules in the row

RJ45 output socket, to connect the module to the following SIG7900 in the headend

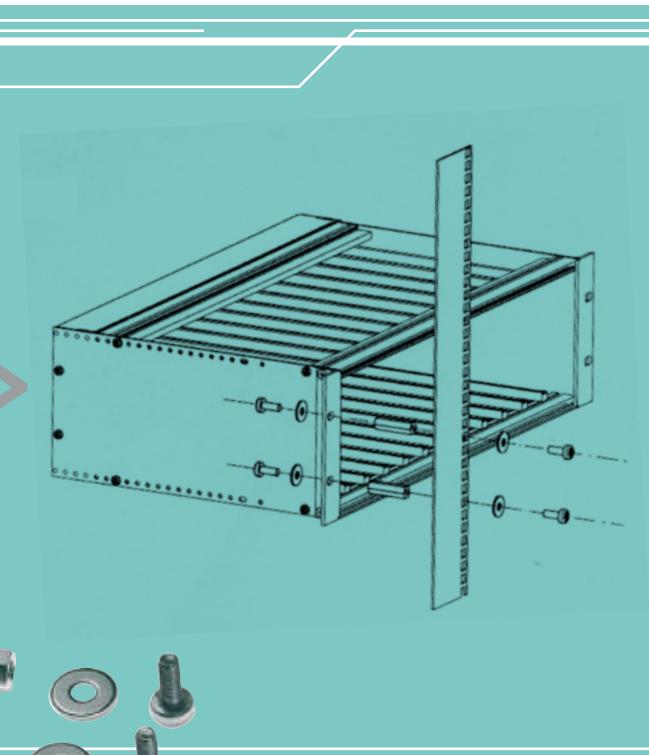

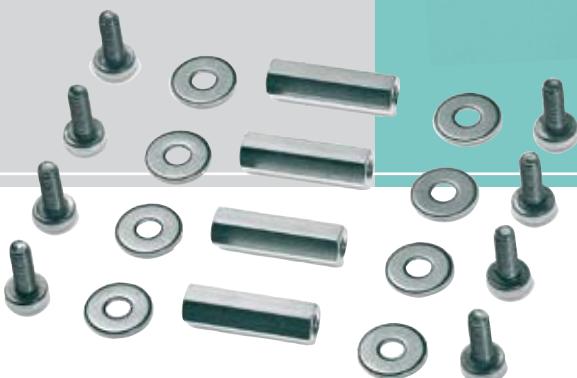

Extracting hole

>>Accessories

>>SIG7903 (code 283928)

Spacer kit

Spacer kit to allow
the 19"subrack
SIG7901 to be mounted
further back than the
other equipment
in the 19"rack cabinet.

>>SIG7904 (code 283927)

Front plate

Front plate to be used with
SIG7901 and SIG7902 to
cover empty slots.

Height = 3U
Width = 7e

Packaging = 5 pieces
Screws included in the bag

>>Accessories

>>TPE (code 282733)

Programming unit for K series
and Headline series

Programming unit with numeric
keypad and graphic display.
Enables the programming
of all modules in the Headline range.

TECHNICAL DATA

Power supply	5V (RJ45 connector, pin 1)
Consumption	600mW
Operating temperature	-10 to +45 °C
Connection	RJ45, USB type B
Display	LCD graphic backlit display, 16x4 characters
Keypad	18 buttons
Interface	RS485 (RJ45 pin2=A, pin3=B) UART (RJ45 pin5=RX, pin6=TX) USB

Features

- Compatible with all K-series modules (emulates the KTP for original modules)
- Compatible with all headline modules
- USB drivers available for PC connection
- USB rate: from 9,600 to 115,200bit/s
- RS485 rate: from 9,600 to 115,200bit/s
- UART rate: from 9,600 to 115,200bit/s. TTL level (0-5V)
- Menu language available: Italian, English, German, French, Spanish and Portuguese
- Max addressable modules: 253
- Copy function available, to copy the settings from one device to another
- Adjustable contrast (31 steps)
